# South Timbalier Bay Cable

## Acquisition Parameters

Recording System	DFS V
Line Orientation	NE/SW
Energy Source	110 bar-m
OBC Cable Length	4550 m
Line Spacing	50 m
Nominal Fold	46
Record Length	8 s

## Processing Flow

Record length: 8 s
3D refraction / residual statics
3D DMO
3D time migration
Final cell size: 12.5 x 25 m
Survey completed May 1994
